- Show Name: Pentest+ (PT0-002)
- Topic Name: Attacks and Exploits
- Episode Name: Mobile Attacks

==

Mobile Attacks

Objectives:

- List and define common vulnerabilities, attacks and tools used for pentesting mobile devices

---

- Attacks
    - Reverse Engineering
        - Decompilers
        - Static/Dynamic Code Analysis
            - Look for...
                - Creds
                - Keys
                - API info
        - Mobile Security Framework(MobSF)
    - Sandbox Analysis
        - Typical task of malware analysts
        - Load app into controlled, monitored environment
            - See how the app behaves
    - Spamming
        - Phishing
        - Malicious attachments
- Vulnerabilities
    - Insecure Storage
        - No encryption at-rest
        - Removable media
    - Passcode Vulnerabilities
        - Weak passcodes
        - Applications
            - Frida may help bypassing authentication process
    - Certificate Pinning
        - Adding in malicious keys to bypass legit key
    - Using Components with Known Vulnerabilities
        - Dependency Vulnerabilities
        - Patching Fragmentation
            - Multiple versions in the ecosystem

            - Results in patches that can't be applied
            - Patches don't exist
            - Just not installed
    - Execution of Activities Using Root
        - Over-Reach of Permissions
            - May give an attacker a foothold into the system
    - Biometrics Integration
        - Using pictures
        - Gummy Fingerprint
    - Business Logic Vulnerabilities
- Tools
    - Burp Suite
    - Drozer
        - https://labs.f-secure.com/tools/drozer
    - Mobile Security Framework
        - https://mobsf.github.io/Mobile-Security-Framework-MobSF/
    - Postman
        - https://www.postman.com/
    - Ettercap
    - Frida
        - Injects snippets of JavaScript
        - https://frida.re/docs/home/
    - Objection
        - Runtime mobile exploration toolkit powered by Frida
        - https://github.com/sensepost/objection
    - Android SDK Tools
        - Exploit Dev
        - https://developer.android.com/studio/
    - APK-X
        - Reverse Engineering
        - https://github.com/b-mueller/apkx
    - APK Studio
        - Reverse Engineering
        - https://github.com/vaibhavpandeyvpz/apkstudio
