

Host-Based Data Collection and Analysis

Objectives:

- Explain the purpose and characteristics of host-based data sources.

Outline:

- Logs
 - System Logs
 - Service Logs
 - SSH
 - Time
 - Crypto Protocol
 - User
 - Success/Failure
 - HTTP
 - Methods (GET/POST)
 - Status Codes
 - Headers
 - User Agents
 - SSL Debugging
 - SQL Logs
 - Access Logs
 - Query Strings
 - SMTP
 - FTP
 - DNS
 - Suspicious lookups/domains
 - Types of DNS queries
 - Windows Event Logs
 - App log
 - System log
 - Security log
 - Linux Syslog
 - App Logs
 - Browser
 - HIPS Logs
 - AV Logs
 - Integrity Checker
- Cloud
 - Audit Logs
 - Threat feeds
 - Security Bulletins
- Vulnerability Testing Data
 - Third-party data
 - Automated/Software Testing Programs
