

Vulnerability Assessments

Objectives:

- Understand the typical steps taken to plan for and perform a vulnerability assessment.

Outline:

- Plan the VA
 - Identify critical assets and data
 - Establish scope
 - Determine scanning frequency
 - Regulatory requirements
 - Changes to the system
- Perform a VA
 - Determine scanning criteria
 - Utilize scanning tools
 - Identify and assess exposure
 - Generate reports
- Conduct Post-Assessment Tasks
 - Remediate/Mitigate vulnerabilities
 - Hardening
 - Patches
 - Configurations
 - Exceptions Documented
 - Conduct audit
 - Validate action was taken
