

Python Scripts for Security Appliance API Calls

Objectives:

At the end of this episode, I will be able to:

1. Describe the use of Python scripts for making API calls

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember to visit the Cisco DevNet site and practice generating API calls using a Cisco appliance. There are several sandboxes available for this purpose!

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

This is an excellent article on using Python scripts for API calls against Cisco DNA Center:
