

Common Threats to On-Prem

Objectives:

At the end of this episode, I will be able to:

1. Describe common threats faced in on-prem networks and infrastructure
2. Describe the basic operational approach of these threats

Additional resources used during the episode can be obtained using the download link on the overview episode.

Consider making flash cards here if that will help you on these terms and the many others we will be covering:

- Malware
- Viruses
- Worms
- Trojan
- DoS
- DDoS
- Direct DDoS
- Reflected DDoS
- Amplified DDoS
- Phishing
- Rootkits
- Man-in-the-middle

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

This goes a bit out of our scope, but is still a great read:
