

Fundamentals of PKI

Objectives:

At the end of this episode, I will be able to:

1. Describe the need for PKI
2. Explain the components that are used for the PKI infrastructure

Additional resources used during the episode can be obtained using the download link on the overview episode.

The PKI is made up of:

- The Certificate Authority
- Digital certificates
- The root certificate

Remember the following:

- The root CA can use intermediate CAs in the network to help with the workload
- The PKI can use the X.509 certificate information
- The solution uses asymmetric encryption algorithms in its operation

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

If you want a much deeper dive on the PKI - check out this great post:
