

IKEv1 vs IKEv2

Objectives:

At the end of this episode, I will be able to:

1. Explain the major differences between IKEv1 and IKEv2
2. Provide an example of usage for network telemetry

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the operational characteristics of IKEv1:

Phase 1 – main mode (6 messages) or aggressive mode (3 messages); used for the IKE SA

Phase 2 – quick mode (3 messages); IPsec SA

Here are the major enhancements to IKEv2:

- DoS protection
- Fewer round trips (2 messages)
- DPD
- Unidirectional authentication

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is a nice document that discusses the Version 2 enhancements that we are excited about in the industry:
