

Security Intelligence Authoring, Sharing, and Consumption

Objectives:

At the end of this episode, I will be able to:

1. Describe the modern approach to shared security intelligence
2. Describe the need for such modern approaches to security intelligence

Additional resources used during the episode can be obtained using the download link on the overview episode.

Here are some key points you should remember from this episode:

- The authoring of content can be automated thanks to new technologies like efficient telemetry and cloud analytics
- The Cisco security intelligence initiative (along with other vendors) is called Talos

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

There is excellent (and free) information available from Talos. Check it out here:
