

Configure and Verify the Remote Access VPN

Objectives:

At the end of this episode, I will be able to:

1. Understand the concepts of the remote access VPN
2. Understand a configuration approach to a typical remote access VPN

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the main topics of discussion in this episode:

- There are many configuration options for the remote access VPN as well as many devices that can be utilized from the Cisco portfolio
- This episode gave a look at one type of solution

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the configuration guide for the AnyConnect remote access VPN using the ASA. This guide uses the GUI on the ASA for the configuration:
