

Debugging and Showing IPsec Verifications

Objectives:

At the end of this episode, I will be able to:

1. Describe an approach to show commands and debug commands when verifying IPsec

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the main topics of discussion in this episode:

- There are commands for the various phases of the VPN
- Always follow a flow when analyzing the various VPN components

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is an excellent resource for debugging IPsec:

<https://www.cisco.com/c/en/us/support/docs/security/vpn/ipsec-negotiation-ike-protocols/5409-ipsec-debug-00.html>

Here is an excellent resource that shows the most common issues and how you can track them down:

<https://www.cisco.com/c/en/us/support/docs/security/asa-5500-x-series-next-generation-firewalls/81824-common-ipsec-trouble.html>
