

NetFlow and Flexible NetFlow

Objectives:

At the end of this episode, I will be able to:

1. Describe the major components of Flexible NetFlow
2. Understand the major aspects of the configuration

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the components of Flexible NetFlow:

- Flow Records - define precisely what you want to capture
- Flow Monitor - apply this to the interface to actually do the monitoring
- Flow Exporter - use this tool to send the traffic to a remote collector system
- Flow Sampler - you can use this component to limit the load imposed by NetFlow

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the complete configuration guide for Flexible NetFlow:
