

Storm Control

Objectives:

At the end of this episode, I will be able to:

1. Describe the purpose of storm control
2. Understand how this feature is configured

Additional resources used during the episode can be obtained using the download link on the overview episode.

Storm Control is a powerful DoS protection that is simple to configure. Using this feature, you can guard against "storms" of unicast, multicast, and/or broadcast traffic.

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the configuration guide for this feature:
