

Management Options for Security Solutions

Objectives:

At the end of this episode, I will be able to:

1. Describe the purpose of network telemetry
2. Provide an example of usage for network telemetry

Additional resources used during the episode can be obtained using the download link on the overview episode.

The management options here are centered around Cisco Firepower. We have:

- The Firepower Management Center (FMC) - this tool is designed to manage all your Firepower devices
- Firepower Device Manager (FDM) - this tool is for the management of the single, local Firepower device
- The ASDM (Adaptive Security Device Manager) - this tool is a GUI for managing the ASA, and can be used to manage the Firepower module in your ASA

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the Firepower Compatability Guide that I showed in class:
