

Introducing Cisco Firepower Devices

Objectives:

At the end of this episode, I will be able to:

1. Understand the basics of the Cisco Firepower security devices
2. Describe the options for Cisco Firepower

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the main topics of discussion in this episode:

- Cisco Firepower Management Center (FMC and FMCv) - this is the management device for your Firepower appliances and VMs
- Cisco Firepower Threat Defense (FTD and FTDv*) - these are the security devices themselves
- You can run the FMCv in AWS
- You can run the FTDv in AWS - currently it called the NGFWv
- NGFWv in AWS - 2 management interfaces; 2 data interfaces; No support for – IPv6, transparent mode, snapshots

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the documentation for the NGFWv in AWS:

https://www.cisco.com/c/en/us/td/docs/security/firepower/quick_start/aws/ftdv-aws-gsg.html
