

Web Proxy Identity and Authentication

Objectives:

At the end of this episode, I will be able to:

1. Understand the concepts of identities and authentication as they relate to the Cisco WSA
2. Describe the options available in the Cisco WSA related to identities and authentication

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the main topics of discussion in this episode:

- It is very common to tie the Cisco WSA into the Active Directory of the Enterprise
- The WSA can identify and authenticate based on MS AD for convenience
- You can also define what will happen if authentication should fail

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the documentation for the Cisco WSA regarding this discussion:

https://www.cisco.com/c/en/us/td/docs/security/wsa/wsa11-8/user_guide/b_WSA_UserGuide_11_8/b_WSA_UserGuide_11_7_chapter_0101.html
