

# Endpoint Posture Assessment Solutions

## Objectives:

At the end of this episode, I will be able to:

1. Describe endpoint posture
2. Discuss Cisco solutions

Additional resources used during the episode can be obtained using the download link on the overview episode.

---

Remember the main topics of discussion in this episode:

- A posture assessment configuration flow can be - Posture Conditions; Posture Remediations; Posture Requirements; Posture Policy; Client Provisioning; Access Policy
- A Windows 10 example - ensure Windows firewall is enabled; check for USB attached devices; check for anti-malware; check for critical patches; check for apps installed
- Key Cisco components for end system posture assessment - ISE and Cisco AnyConnect

---

## External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is an overview on Cisco ISE:
