

Guest Services and BYOD

Objectives:

At the end of this episode, I will be able to:

1. Explain the importance of guest access and BYOD
2. Explain the main features of Cisco ISE

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the main topics of discussion in this episode:

- Cisco ISE supports wired, wireless, and VPN
- ISE supports auditing and posture
- ISE handles profiling, guest access, guest portals
- ISE does BYOD; MDM integration; certificate management; CTS
- ISE uses pxGrid; TACACS+; RADIUS; LDAP; AD
- ISE can be physical or virtual

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the At a Glance info for Cisco ISE:
