

Device Compliance and Application Control

Objectives:

At the end of this episode, I will be able to:

1. Describe ISE Posture Policies
2. Discuss agents
3. Describe posture leases and reassessments
4. Describe additional ISE aspects for compliance

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the main topics of discussion in this episode:

- ISE posture policies
- Agents: AnyConnect; AnyConnect Stealth; Temporal Agent
- Posture lease – AnyConnect agent; 1 to 365 days
- Periodic reassessments - Must be in compliance; Uses CoA
- Inline posture node; ISE persona for posture only; Can be HA pair
