

The FMCv in AWS

Objectives:

At the end of this episode, I will be able to:

1. Discuss the FMC and its purpose
2. Discuss the general requirements and restrictions that exist when using the FMCv in AWS

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- You will need to create the VPC AWS infrastructure to support the FMCv
- The FMCv requires at least one interface - this is the management interface
- IPv6 is not currently supported
- You cannot add interfaces after boot
- Cloning/snapshots are currently not supported
- High Availability is not supported

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the direct link to the online book regarding the FMCv:
