

Adding the NGFWv to the FMCv

Objectives:

At the end of this episode, I will be able to:

1. Describe the steps required to add a FTD system to an FMC

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember:

- Remember that you set a registration ID on the FTD. This can be any sequence of numbers and letters you will remember.
- You can drop out to the command line on the FTD and the FMC in order to do verifying like PING.

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Here is the direct link to the documentation on this process:
