

Interface Types and Modes

Objectives:

At the end of this episode, I will be able to:

1. Describe the various modes for interfaces in the Firepower lineup of devices
2. Describe the basic operational characteristics of these different interface modes

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember:

- Be sure to be able to describe the basic operational characteristics of each of these:
- Routed mode interface
- Inline set
- Inline set with tap mode
- Passive
- Passive ERSPAN

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
