

Multi-Instance Deployments

Objectives:

At the end of this episode, I will be able to:

1. Understand what multi-instance deployments really mean in Firepower
2. Describe common options for this configuration in the Cisco Firepower

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember:

- You can have one native instance and multiple container instances
- This is only available on the Firepower devices in FMC - no ASA devices permitted
- Radware DefensePro is an example of a container instance
- You can use physical interfaces, subinterfaces, or shared interfaces
- You can configure resource profiles to control resource usage
- You can have from 3 to 18 container instances depending on your platform

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
