

SSL Policies

Objectives:

At the end of this episode, I will be able to:

1. Describe the SSL policy approach in Cisco Firepower
2. Provide examples of using an SSL policy
3. Describe the configuration approach to SSL policies in the Cisco Firepower system

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- The SSL policy dictates how encrypted traffic is handled by your FTD
- Remember, you can define actions based on the following 1) if the traffic is encrypted or not 2) whether your FTD can decrypt the traffic or not
- Once again, this is a policy that you assign by linking it to your access control policy

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
