

Network Discovery

Objectives:

At the end of this episode, I will be able to:

1. Describe the purpose of network discovery in the Cisco Firepower system
2. Describe the configuration approach to network discovery

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- Your Cisco Firepower can learn the networks, applications, and users in your network
- The Firepower can use this information to provide more detailed and more useful reports regarding security events and activities on the Firepower system
- To have the Firepower discover your identities, you need to create an identity realm and directory
- While the Firepower has many different application definitions, you can always customize this database to incorporate your own custom applications

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
