

Identity Policies

Objectives:

At the end of this episode, I will be able to:

1. Describe the use of identity policies in Cisco firepower
2. Describe the need for identity policies
3. Explain the process of configuring identity policies in the Firepower

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- You begin this configuration by defining your realm
- You can easily incorporate LDAP and AD directory stores
- You can configure no authentication whatsoever, passive authentication, or active authentication

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
