

Device Management

Objectives:

At the end of this episode, I will be able to:

1. Describe the domain approach used with Firepower
2. Describe the various components of the domain structure of Firepower

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- You have the ability to use domains with your Firepower deployments
- Domains segment user access, configurations, and events
- There is the global domain, the current domain, child domains, ancestor domains, and many more types
- Use the link below to review the domain types and rules

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
