

Security Intelligence

Objectives:

At the end of this episode, I will be able to:

1. Explain the role of security intelligence in the functionality of the FTD
2. Configure the security intelligence operations for the FTD

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- There is security intelligence filtering right after the prefilter policy - this round focuses on IP addresses
- There is security intelligence filtering after the access control policy - this round focuses on DNS and URLs
- You can control the feeds for security intelligence by configuring them in the Objects section of the FMC

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
