

Intrusion Policies

Objectives:

At the end of this episode, I will be able to:

1. Describe the intrusion policies possible in Cisco Firepower
2. Describe the configuration approach to intrusion policies in the Cisco Firepower

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- Intrusion policies, like so many other policies, are tied in to the access control policy
- These policies are considered the "last line" of defense before a packet makes it to its destination
- If you have an inline configuration with your FTD, you can block traffic based on intrusion policy violations

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
