

## Troubleshooting with the CLI-GUI

### Objectives:

At the end of this episode, I will be able to:

1. Explain the many points at which a packet can get dropped and why in the Cisco Firepower system
2. Explain the tools available to help troubleshoot unexpected packet drops with the Cisco Firepower system

Additional resources used during the episode can be obtained using the download link on the overview episode.

---

Remember the following points:

- I included the official reference materials in the link below
- Be sure to think about the packet flow in your troubleshooting and check things step by step as you go

---

### External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
