

Cisco AMP

Objectives:

At the end of this episode, I will be able to:

1. Explain what AMP is all about
2. Explain the two different versions of AMP
3. Describe how AMP can integrate with Firepower

Additional resources used during the episode can be obtained using the download link on the overview episode.

Remember the following points:

- There is AMP for networks and AMP for endpoints
- There is no longer an AMP for Firepower
- AMP for endpoints works on the endpoints, but the reporting can be sent to Firepower
- Firepower can actively prevent traffic based on AMP for networks which it runs

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:
