

Endpoint Detection and Response

Objectives

- What is EDR?
 - Utilizes ML, Behavioral Analysis, and Threat Hunting to detect suspicious activity
 - Detects sophisticated and targeted attacks
 - Also blocks and alerts
- How is it different from AV?
 - AV PREVENTS malware from infecting endpoints
 - EDR DETECTS and RESPONDS to malware that makes it past AV
- How does it work?
 - Admin installs an agent (typically)
 1. Monitors and collects data
 - User activity
 - System activity
 2. Builds baselines
 3. Watches for unusual User and/or System behavior
 - Network activity
 - File Access
 - System changes
 - Data exfiltration
 - Data encryption (ransomware)
 - Malware signatures
 4. Automated Response and Remediation
 5. Reporting
