

DNS and IP Reputation Tools

Objectives

- Define DNS and IP reputation
 - DNS Reputation
 - Focused on Domain Names associated with IPs
 - Determines if a domain name has been associated with suspicious or malicious behavior
 - Spam
 - Phishing
 - Malware
 - IP Reputation
 - Determines if an IP address has been associated with suspicious or malicious behavior
 - Spam
 - Phishing
 - Malware
- How are DNS/IP Reputations used by security professionals?
 - Can be used to block access to websites or other online resources associated with the domain.
 - Often used by web filtering and security services to help protect users from accessing potentially harmful websites.
- WHOIS
 - Can't perform reputation lookup
 - Can be used to get the NameServer info for a Domain
 - Then you can check the reputation for the NameServers
