

User and Entity Behavior Analytics

Objectives

- What is UEBA?
 - Used to detect compromised account creds
 - Can also help determine if real users pose a risk
- How does it work?
 - Built-in function to many SIEM solutions
 - Splunk
 - M\$ Sentinel
 - Gathers information about "Normal" user activity
 - When/where logins occur
 - User's role
 - Systems and Apps accessed by user
 - Uses ML to detect anomalies
 - Abnormal Account Activity
 - Impossible Travel
 - Generates alerts
 - Security teams can then investigate/remediate
