Domain: Threat Intelligence and Threat Hunting Concepts

Episode: TTPs

TTPs

Objectives

- What are TTPs?
 - Tactics
 - High-level overview of an attacker's goal(s)
 - Gain system access
 - Disrupt service of target
 - Steal target's data
 - Establish persistence
 - Techniques
 - Specific methods and/or tools used to achieve attacker's goal(s)
 - Use malware to gain system access
 - Perform DDoS attack to disrupt network service
 - Use Social Engineering to steal sensitive data
 - Use Backdoor/RAT to establish persistence
 - Procedures
 - Low-Level, step-by-step description of a technique
 - Recon
 - OSINT
 - Active/Passive Scanning Ports and Services
 - Social Media
 - Phishing for creds
 - Initial Access
 - Exploit software Vulns
 - Use stolen creds
 - Brute-Force
 - Malware
 - Lateral Movement
 - Password Reuse
 - PTH
 - Cracking password hashes
 - Misconfigured Shares
 - Persistence
 - RAT
 - Backdoor accounts
 - Data Exfil
 - C2
 - Stego
 - Covert Channels
