

CTI Confidence Levels

Objectives

- **Three CTI Types**

1. *Strategic*

- Long-term planning
- Focuses on the "Who" and "Why"
 - Identify potential vulns and threats
 - Identify adversarial motives and capabilities

2. *Tactical*

- More "Short-Term" planning
- Tailored to specific teams, operations, and investigations
 - Focuses on TTPs of likely adversaries
 - Aids in Threat Hunting efforts

3. *Operational*

- Focuses on responding to active threats
- Utilizes technologies to actively defend systems
 - SIEM
 - SOAR
 - EDR
 - IDS/IPS
 - IOCs
- Threat-intel feeds
 - Anomali
 - Carbon Black
 - OpenCTI
 - <https://demo.opencti.io>

- **Timeliness Levels**

- Historic/Past
 - LEAST Relevant
 - Outdated
- Current/Present
 - MOST Relevant
- Forecasted/Future
 - MODERATELY Relevant
 - Projected/Predicted Intel
- Indeterminate/Unknown
 - LIMITED Relevancy
 - Not enough is known to assess reliability

- **Relevancy Levels**

- Low
 - Too generic

- Moderate
 - Somewhat generic
 - But still has indications that it could be useful
 - High
 - Specific to your org/systems
 - Very High
 - Highly specific
 - Tailored to your org/systems
- Accuracy Levels
 - Low
 - Incomplete
 - Outdated
 - Unverified sources
 - Moderate
 - Partially verified
 - Still some uncertainty about accuracy
 - High
 - Verified
 - Very High
 - Extensively verified
