Domain: Threat Intelligence and Threat Hunting Concepts

Episode: CTI Sharing

## CTI Sharing

### Objectives

---

- Better security through sharing CTI
  - Sharing CTI benefits us all during
    - Incident Response
    - Vulnerability Management
    - Risk Management
    - Security Engineering
    - Detection and Monitoring
- Sharing tools
  - Structured Threat Information eXpression (STIX)
    - <https://oasis-open.github.io/cti-documentation/>
    - Formatted/Serialized CTI data
      - Designed to be shared with others
    - <https://oasis-open.github.io/cti-documentation/stix/examples>
  - Trusted Automated eXchange of Intelligence Information (TAXII)
    - HTTPS/RESTful API service used for sharing CTI data
      - STIX and Non-STIX data
    - Models
      - Hub-and-Spoke
    - Single information repository
      - Producers add to the repo
        - Consumers pull from the repo
      - Peer-to-Peer
      - Source-Subscriber
    - Single info repo
      - Subscribers pull from repo
  - Yara
    - Identify and classify malware samples
      - <https://yara.readthedocs.io/en/stable/>
  - Sigma
    - <https://github.com/SigmaHQ/sigma>
