Domain: Threat Intelligence and Threat Hunting Concepts

Episode: Threat Hunting

Threat Hunting

Objectives

- What are Indicators of Compromise (IoC)
 - File hashes
 - IP Addresses
 - Domain names
 - URLs
 - Anything associated with the breach
 - <https://github.com/eset/malware-ioc>
- What is the process of obtaining IoCs?
 - Collection
 - Logs
 - Files
 - Other Data
 - pcaps
 - LOLBINs
 - email addresses
 - Registry Entries
 - Analysis
 - Reverse engineering malicious binaries (SAST)
 - DAST
 - Memory Dumps
 - Strings
 - Metadata
 - Application
 - Tracking threats
 - Attribution
- Focus areas
 - Configurations/misconfigurations
 - Isolated networks
 - Business-critical assets and processes
- What is "Active Defense"?
 - Wasting the attacker's time
 - Increasing the probability of detection
 - Even baiting the attacker into getting detected
 - Fake websites/pages/directories/login portals/etc
 - Canary Tokens
 - <https://canarytokens.org/generate>
 - Inticing files/data
 - API Keys
 - SSH Keys
 - Encryption Keys
 - Sensitive-looking documents
 - Creds.txt
 - Financial docs

- Honeypot
