- Topic Name: Information Gathering and Vulnerability Assessment
- Episode Name: DNS Recon

DNS Recon

Objectives:

- Identify and demonstrate use of DNS tools like nslookup, dig, and host.
 - Utilize DNS tools to gather target information.
-

- What info can we get from DNS?
 - It can help us find and enumerate hosts to add to target list
 - `nslookup zonetransfer.me`
 - `dig zonetransfer.me`
 - `host zonetransfer.me`
- Primary and Secondary nameservers
 - `host -t ns zonetransfer.me`
- Forward and Reverse Lookups
 - Forward lookups
 - Translate domain names to IP addresses
 - Reverse lookups
 - Translate IP Addresses to domain names
- Zone Transfer
 - Give you a nice map of the target's network infrastructure
 - `dig axfr zonetransfer.me @nsztml.digi.ninja`
 - `dnsenum zonetransfer.me`
