- Episode Name: Privilege Escalation

Privilege Escalation

Objectives:

- Define privilege escalation and describe its different types
 - List common privilege escalation techniques
-

- Priv Esc Types

- Horizontal

- Attacker gains access to another non-admin account
 - Other non-admin account can have access to things that could lead to admin privilege

- Vertical

- Attacker gains access to system or domain admin/root account

- Priv Esc Techniques

- Windows ()

- Unquoted Service Paths
 - DLL Hijacking
 - Unattended Install File
 - Password Reuse
 - Misconfigured permissions
 - Scheduled Tasks
 - Kernel Exploit
 - RUN POWERUP.PS1
 - Script Execution Bypass
 - `powershell.exe -exec bypass`
 - Run AMSI bypass
 - `Import-Module .\ServiceUp.ps1`
 - `Invoke-AllChecks`

- Linux

- `sudo abuse`
 - SUID/GUID binaries
 - Insecure Binary Invocation
 - Scripts call binaries without using full paths
 - Kernel exploits
 - Services running as root
 - Password reuse
 - Misconfigured file permissions
 - `/etc/passwd`

- Cron Jobs
