- Show Name: Intro to IoT Pentesting
- Topic Name: Target Analysis
- Episode Name: Hardware Enumeration

=====

Hardware Enumeration

Objectives:

- Perform analysis of IoT hardware components for vulnerability analysis

-
- Why do we need to analyze the hardware of our IoT targets?

- Help us know the architecture
- Identify connectivity technologies
 - wifi, bluetooth, nfc, rfid, etc
- Identify debug connections
 - JTAG, UART, SPI, I2C

- Where do we begin?

- Vendor Websites
 - Product and Support pages
- FCC IDs
 - <https://www.fcc.gov/oet/ea/fccid>
 - <https://fccid.io/search.php>
- Datasheets
- Google
