- Show Name: Intro to IoT Pentesting
- Topic Name: Exploiting Vulnerabilities
- Episode Name: Exploiting Embedded OS

=====

## Exploiting Embedded OS

### Objectives:

- Perform system exploitation against embedded operating systems
- 
- Explain embedded OS
    - Small, fast, streamlined versions of operating systems meant to be used in IoT devices
  - Are they secure?
    - Maybe
      - Vendor maintenance?
        - Patches
        - Updates
      - User maintenance?
        - Regular patching/updating
        - Compensating controls
      - Network Services?
        - Web interface
        - FTP
        - SSH/Telnet
      - Encryption?
      - Connectivity?
        - Wifi
        - bluetooth
  - Demo?
    - EternalBlue Demo
